

OKON, LAWRENCE OKPO

DRIVEN BY DESIGN AND INNOVATION

SUMMARY

Emerging Full-Stack Developer and Product Designer with a mobile-first, design-forward mindset. Specialized in building high-performance, accessible web applications optimized for low-bandwidth and varied hardware environments. Proven experience engineering secure backends (Node.js, Express, PostgreSQL, MongoDB), building dynamic frontends (React, Next.js, TypeScript), and translating complex brand identities into intuitive interfaces.

CORE SKILLS & TOOLS

- **Frontend:** React, Next.JS, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS.
- **Backend & Database:** Node.JS, Express, MySQL, PostgreSQL, MongoDB, RESTful APIs, Swagger API Documentation, OAuth.
- **Design & Prototyping:** Figma, CorelDraw, Adobe Photoshop, Wireframing.
- **Deployment & Tools:** Git, GitHub, npm, Vercel, Render, pgAdmin.

PROFESSIONAL & INDEPENDENT PROJECTS

High-impact, production-ready applications currently engineered for independent clients and live brand environments.

● TheEliteGlam-Premium Pageant & Event Platform

Full-Stack Developer & Designer | In Development

- **Tools & Tech:** Next.js, Node.js, PostgreSQL, Paystack API, Tailwind CSS.
- Designing and architecting a premium web platform for a major pageant brand, implementing a high-fidelity dark-and-gold visual system.
- Building a scalable database schema using PostgreSQL to handle multi-page structures, including dynamic contestant profiles, event registration tracking, and media blogs.
- Integrating the Paystack API to handle secure digital transactions for automated event ticket sales and a live, real-time contestant voting system.

● Edrealz Xtiches – Fashion E-Commerce Platform

Team Lead & Developer | In Development

- **Tools & Tech:** Next.js, Node.js, PostgreSQL/MongoDB, Paystack API, Figma
- Leading a team of student developers to design and build a secure fashion e-commerce architecture using Next.js.
- Managing the UI/UX direction in Figma and designing relational database tables to smoothly map out product catalogs, user carts, and variant inventory management.
- Implementing secure, production-ready payment processing flows via Paystack API integration to process customer checkouts safely.

TOOLS

Frontend:

React
Next.JS
TypeScript
JavaScript (Es6+)
HTML5
CSS3
Tailwind CSS

Backend & Database:

Node.JS
Express
MySQL
PostgreSQL
MongoDB
RESTful APIs
Swagger API Documentation

Design & Prototyping:

Figma
CorelDraw
Adobe Photoshop
Wireframing

Deployment & Tools:

Git
GitHub
npm
Vercel
Render
pgAdmin

ACADEMIC DEVELOPMENT PROJECTS

Curriculum-driven builds engineered to master full-stack milestones, relational/non-relational database design, and team-based software collaboration.

Handcrafted Haven – Artisan Marketplace

Full-Stack Developer / Collaborator / Group Project (WDD430 Milestone)

- **Tools & Tech:** React, Node.js, PostgreSQL, Git, GitHub, Figma
- Collaborated within an agile team of student developers to architect a virtual marketplace platform bridging local artisans with digital consumers.
- Contributed heavily to the shared repository setup, branch management, and feature task delegation via GitHub.
- Designed responsive, accessible interfaces in Figma to ensure an optimal user experience on budget mobile devices in low-bandwidth environments.

Personal Expense Tracker API

Backend Developer (CSE341 Milestone)

- **Tools & Tech:** Node.js, Express, MongoDB, Swagger UI, Render
- Engineered a secure RESTful expense tracking backend API utilizing Node.js and Express, deployed seamlessly on Render.
- Modeled and queried a non-relational MongoDB database, leveraging its flexible document schema to efficiently store, update, and aggregate user expense logs.
- Built, tested, and published comprehensive, interactive API endpoint documentation using Swagger UI.

CineVibe – Movie Exploration Tool

Frontend Developer (WDD330 Milestone)

- **Tools & Tech:** JavaScript (Es6+), TMDB API, YouTube API, HTML5, CSS3, GitHub Pages
- Developed a high-performance movie discovery interface utilizing asynchronous JavaScript to fetch live data from the TMDB API and integrated trailer playback via the YouTube API.
- Designed an immersive, dark-mode UI optimized to reduce user "decision fatigue" via fluid search-to-selection flows .
- Optimized frontend logic and data caching to guarantee lag-free, asynchronous performance on lower-tier mobile hardware.

AbegChop – Mobile-First Food Discovery Platform

UI/UX & Frontend Developer (WDD231 Milestone)

- **Tools & Tech:** Figma, HTML5, CSS3, JavaScript, Local JSON Data
- Designed and built a "thumb-friendly" UI/UX layout optimized specifically for campus-based mobile environments.
- Structured local JSON data feeds to implement a dynamic frontend architecture featuring real-time category filtering and interactive restaurant menus .

INTERESTS

- Product Design
- Mobile-First App Performance
- UI/UX System Design
- Music Theory Instruction
- Community Mentorship

WORK & VOLUNTEER EXPERIENCE

Freelance Product Designer & Developer

Remote | 2023 – Present

- Design and develop responsive user interfaces for small businesses and tech startups using Figma, React, and Tailwind CSS.
- Build comprehensive design systems, high-fidelity wireframes, and interactive prototypes to elevate cross-platform user experience .

UI/UX & Front-End Design Volunteer

Community Tech Outreach (Calabar) | June 2024 – Jan 2025

- Partnered with local developers to design and deploy accessible, user-friendly web platforms for regional NGOs.
- Mentored beginner tech enthusiasts in Figma design systems and foundational frontend toolkits (HTML, CSS, JavaScript).
- Facilitated digital literacy and web-presence workshops for local youth and neighborhood small business owners .

Graphic Designer

University of Calabar Printing & Publishing Press | 2018 – 2021

- Managed visual layout composition, color calibration, and print quality control for university departments and journals.
- Translated complex organizational identities into clean print media, sharpening core visual storytelling and project management skills .

EDUCATION

Brigham Young University – Pathway Worldwide (BYU-Pathway)

B.Sc. in Software Development

(In Progress)

Relevant Coursework:

- ITM 111 (Introduction to Database),
- WDD 231 (Web Frontend),
- WDD 330 (Advanced Frontend Development),
- CSE 340 (Backend Development),
- CSE 341 (Web Services),
- WDD 430 (Web Full Stack Development).

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Web and Computer Programming Certificate – BYU-Idaho, 2026
- Web Development Certificate – BYU-Idaho 2026
- Advanced Professional Communication & Collaborative Workflows – LinkedIn Learning Certification, 2026
