

OKON, LAWRENCE OKPO

DRIVEN BY DESIGN AND INNOVATION

PROFESSIONAL STATEMENT

Emerging Full-Stack Developer & UI/UX Designer

Full-stack developer with a design-first mindset, specializing in building functional, high-performance web applications. I have practical experience engineering backends with Node.js and PostgreSQL, deploying secure platforms on Render, and managing version control via Git. My background in graphic design allows me to translate complex brand identities into intuitive interfaces using Figma and JavaScript. I am focused on creating seamless digital experiences by combining disciplined software engineering with professional visual storytelling.

VOLUNTEERING/WORK EXPERIENCE

Freelance Product Designer

Remote | 2023-Present

- Designed and developed user interfaces for web and mobile applications using Figma, HTML, CSS, and JavaScript.
- Created consistent design systems, wireframes, and interactive prototypes to improve user experience.
- Collaborated with clients and developers to translate ideas into functional, visually engaging digital products.
- Delivered branding, portfolio design, and responsive website projects for small businesses and startups.

UI/UX & Front-End Design Volunteer — Community Tech Outreach Program

Calabar, Nigeria | June 2024 – Jan 2025

- Collaborated with a team of volunteer designers and developers to create user-friendly web interfaces for local NGOs and small community projects.
- Contributed to the redesign of digital platforms that improved accessibility and usability for non-profit organizations.
- Mentored beginner designers in using Figma and basic front-end development tools (HTML, CSS, JavaScript). Supported digital literacy workshops aimed at helping youth and small business owners build an online presence.

Graphic Designer — University of Calabar Printing & Publishing Press

Calabar, Nigeria | 2018 – 2021

- Designed and produced academic materials, banners, event programs, and magazines for university departments.
- Managed layout composition, color calibration, and print quality control.
- Worked closely with university staff to deliver timely and professional visual content.
- Strengthened creative, communication, and project management skills within a production environment.

PROJECTS

CSE Service Network – Full-Stack ServicePlatform

Node.js, Express, PostgreSQL, JavaScript, Render

- **Backend Architecture:** Engineered a secure server-side environment on Render, implementing custom authentication and authorization logic to manage secure user access.
- **Database Management:** Designed and queried a PostgreSQL relational database to handle complex data relationships between volunteers and service organizations.
- **Problem Solving:** Developed a community-focused solution that bridges the gap between local needs and volunteer resources through a clean, professional interface.
- Live Link: <https://cse340-kl7q.onrender.com/>

CineVibe – Cinematic Exploration Tool

Tools: JavaScript, TMDB API, YouTube API, HTML5, CSS3

- **API Integration:** Developed a high-performance discovery tool utilizing the TMDB API for real-time movie data and the YouTube API for integrated trailer playback.
- **UX Strategy:** Focused on eliminating "decision fatigue" by designing an immersive, dark-mode UI with a seamless search-to-selection flow.
- **Technical Performance:** Optimized frontend logic to handle asynchronous data fetching, ensuring a fluid experience during live searches.

INTERESTS

Visual Design

Technology

Molecular Biology

Music

AbegChop – Mobile-First Food Discovery Interface

Tools: Figma, HTML, CSS, JavaScript, JSON

- **User-Centric Design:** Designed a "thumb-friendly" UI/UX optimized for mobile users, emphasizing high-quality visual storytelling and intuitive menu navigation.
- **Dynamic Frontend:** Built the frontend architecture featuring interactive restaurant listings and real-time category filtering.
- **Live Link:**
<https://meetlawrence.github.io/wdd231/project/index.html>

Calabar Chamber of Commerce – Business Portal

Tools: HTML5, CSS3, JavaScript, JSON

- **Information Architecture:** Developed a professional member directory and business spotlight system to improve local economic visibility.
- **Data Integration:** Implemented localized features including dynamic weather integration and multi-grid business layouts.
- **Live Link:**
<https://meetlawrence.github.io/wdd231/chamber/index.html>

EDUCATION

Brigham Young University – Pathway Worldwide (BYU-Pathway)

B.Sc. in Software Development
(In Progress)

University of Calabar, Calabar, Nigeria

B.Sc. in Genetics and Biotechnology
2022 – 2026

LEADERSHIP

Edrealz Website Project (Developers' Team)

Team Lead

- Leading a team of student developers to design and build a fashion e-commerce platform.
- Coordinating UI/UX direction, task delegation, and quality control.
- Encouraging teamwork, innovation, and accountability in project execution.
